PROFESSIONAL SUMMARY

I code out of vocation, not just for a living: I started very young and in 2013 I published my first game on Google Play. Thirteen years later I build backend systems, SaaS and AI automation with Node.js/NestJS, PostgreSQL, Docker and Linux, with over a decade of production systems. I study Philosophy at Universidad de Antioquia to do computational philosophy: formal logic becomes code in ST and auto.logic, and Cauce V3 and Agora take it into real agent systems. I am looking for a team where solid engineering and rigorous thinking count equally. Remote from Colombia or on-site/hybrid in Medellín and Valle de Aburrá.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (Node.js), Python, PHP, SQL
Backend: Node.js, NestJS, Express, REST APIs, microservices, WebSockets, GraphQL, pub/sub
Frontend / data: React, Next.js, PWA · PostgreSQL, MongoDB, Redis, SQLite, Firestore
Cloud & DevOps: Docker, Linux, GCP, Cloud Run, Vercel, Git, GitHub, CI/CD, Prometheus
Security: JWT, OAuth2, HMAC, AES-256-GCM, bcrypt, Firebase Auth
AI, agents & testing: LLM (OpenAI, Anthropic, Gemini), RAG, MCP, OCR, RPA · Jest, unit testing, CI

PROFESSIONAL EXPERIENCE

Founder / Lead Developer — Humanizar Systems

2022 — present · Own project (venture)

- Built a multi-tenant SaaS ecosystem with e-commerce, POS and DIAN e-invoicing, and credit management. NestJS, PostgreSQL and Docker; pub/sub, HMAC webhooks, JWT/OAuth2 and CI/CD. In production with real clients.

CTO / Systems Manager — Finca Directa S.A.S

Nov 2021 — present · Service contract

- Built administrative automation with Node.js and Python: invoice OCR, bank statements, email classification and CRM sync. Idempotency, human validation and decision logging.

Backend Developer — Indie Levels Studio S.A.S

Aug 2021 — present · Fixed-term contract

- Developed and maintained REST APIs and backend services with Node.js/TypeScript and PostgreSQL for game products used across countries. Version control and testing to support stable releases.

Full history —including Critertec / INDOTEL (2024–2026)— and portfolio: informatico.stevenvallejo.com

SELECTED PROJECTS

Cauce V3 · humanizar.tech

Agent-fleet orchestrator: delivery contracts, deployments, monitoring and multi-tenant CRM in production. My flagship engineering project.

ST · auto.logic · Órganon · organon.stevenvallejo.com

Executable formal logic: custom CDCL SAT solver and type theory. auto.logic translates natural language using rules, without AI; Órganon lets you try both. Philosophy turned into software.

Ágora · agora.elenxos.com

Academic platform, collaboration and AI agents. Designed architecture, backend and MCP tools with Zod contracts and real-time communication. Own project, not employment.

EDUCATION & LANGUAGES

Technical Degree in Software Development — SENA (formal qualification) · self-taught background, 13 years coding · over 10 in production

Philosophy — Universidad de Antioquia (in progress) · grounding in logic and reasoning

Languages: Spanish — native · English — strong technical reading and writing; conversational at a working level (B1)
