### SELECTED PROJECTS

#### Cauce V3 · [humanizar.tech](http://humanizar.tech)

Agent-fleet orchestrator: delivery contracts, deployments, monitoring and multi-tenant CRM in production. My flagship engineering project.

#### ST · auto.logic · Órganon · [organon.stevenvallejo.com](http://organon.stevenvallejo.com)

Executable formal logic: custom CDCL SAT solver and type theory. auto.logic translates natural language using rules, without AI; Órganon lets you try both. Philosophy turned into software.

#### Ágora · [agora.elenxos.com](http://agora.elenxos.com)

Academic platform, collaboration and AI agents. Designed architecture, backend and MCP tools with Zod contracts and real-time communication. Own project, not employment.
