## STACK

- **Backend**  
Node.js · NestJS · Express · TypeScript · Python · REST APIs · microservices
- **Data**  
PostgreSQL · MongoDB · Redis · SQLite
- **Cloud & DevOps**  
Docker · Linux · GCP / Cloud Run · Git · CI/CD
- **AI / Agents**  
LLMs (OpenAI/Anthropic) · RAG · MCP · OCR
- **Security**  
JWT · OAuth2 · HMAC · AES-256-GCM
- **Frontend**  
React · Next.js · PWA
- **Testing**  
Jest · unit testing · WebSockets / real-time

## EDUCATION

### Technical Degree in Software Development

SENA · formal qualification

### Self-taught background

13 years coding · over 10 in production

### Philosophy (in progress)

Universidad de Antioquia · grounding in logic and reasoning

## LANGUAGES

### Spanish

Native

### English

Strong technical reading and writing; conversational at a working level (B1).

# Steven Vallejo Ortiz

## Software Engineer · Backend / Cloud / AI Automation

Medellín, Colombia · Remote · 13 years coding (since 2013)

## PROFILE

Backend software engineer with 13 years of coding —since the game I published on Google Play in 2013— and over a decade of systems in production. Node.js/NestJS, TypeScript, PostgreSQL, Docker, Linux and GCP: I built and run a multi-tenant SaaS with e-commerce, POS with Colombian DIAN e-invoicing and credit management, live with real clients, plus AI automation (LLM, RAG, MCP, OCR) that replaces manual work. I have worked as CTO / Head of Systems, senior backend engineer and SysAdmin. I turn the philosophy I study at Universidad de Antioquia into engineering: executable formal logic with a custom CDCL SAT solver and 6,000+ tests, now running in production agent systems (Cauce V3, Agora).

## EXPERIENCE

### Critertec · Systems Administrator (SysAdmin)

Nov 2024 — Jun 2026 (ended) · Fixed-term contract

Administered and secured the production infrastructure running the agency's digital solutions: Linux, Docker, CI/CD, networking, backups, monitoring and hardening, with SQL over PostgreSQL and MySQL. End-to-end SysAdmin and DevOps role.

### Humanizar Systems · Founder / Lead Developer

2022 — present · Own project (venture)

Built a multi-tenant SaaS ecosystem with e-commerce, POS and DIAN e-invoicing, and credit management. NestJS, PostgreSQL and Docker; pub/sub, HMAC webhooks, JWT/OAuth2 and CI/CD. In production with real clients.

### Finca Directa S.A.S · CTO / Systems Manager

Nov 2021 — present · Service contract

Built administrative automation with Node.js and Python: invoice OCR, bank statements, email classification and CRM sync. Idempotency, human validation and decision logging.

### Indie Levels Studio S.A.S · Backend Developer

Aug 2021 — present · Fixed-term contract

Developed and maintained REST APIs and backend services with Node.js/TypeScript and PostgreSQL for game products used across countries. Version control and testing to support stable releases.

Full history —Soy Digital · INDOTEL, ZENIT, INS, Kambban, SENA/SIPAEM, IQpixels and freelance work since 2013— and portfolio: [informatico.stevenvallejo.com](https://informatico.stevenvallejo.com)

## SELECTED PROJECTS

### Cauce V3 · [humanizar.tech](https://humanizar.tech)

Agent-fleet orchestrator: delivery contracts, deployments, monitoring and multi-tenant CRM in production. My flagship engineering project.

### ST · auto.logic · Órganon · [organon.stevenvallejo.com](https://organon.stevenvallejo.com)

Executable formal logic: custom CDCL SAT solver and type theory. auto.logic translates natural language using rules, without AI; Órganon lets you try both. Philosophy turned into software.

### Ágora · [agora.elenxos.com](https://agora.elenxos.com)

Academic platform, collaboration and AI agents. Designed architecture, backend and MCP tools with Zod contracts and real-time communication. Own project, not employment.
