STACK

- **Backend**
Node.js · NestJS · Express · TypeScript · Python · REST APIs · microservices
- **Data**
PostgreSQL · MongoDB · Redis · SQLite
- **Cloud & DevOps**
Docker · Linux · GCP / Cloud Run · Git · CI/CD
- **AI / Agents**
LLMs (OpenAI/Anthropic) · RAG · MCP · OCR
- **Security**
JWT · OAuth2 · HMAC · AES-256-GCM
- **Frontend**
React · Next.js · PWA
- **Testing**
Jest · unit testing · WebSockets / real-time

EDUCATION

Technical Degree in Software Development

SENA · formal qualification

Self-taught background

10+ years of hands-on production experience

Philosophy (in progress)

Universidad de Antioquia · grounding in logic and reasoning

LANGUAGES

Spanish

Native

English

Strong technical reading and writing; conversational at a working level (B1).

Steven Vallejo Ortiz

Software Engineer · Backend / Cloud / AI Automation

Medellín, Colombia · Remote · 10+ years of experience

● PROFILE

I build backend systems, SaaS and AI automation with Node.js/NestJS, PostgreSQL, Docker and Linux. Over 10 years of experience. My background in philosophy and formal logic takes concrete form in ST and auto.logic; Cauce V3 and Agora bring that work into agent systems and collaboration. Available remotely from Colombia or on-site/hybrid in Medellín and Valle de Aburrá.

● EXPERIENCE

Humanizar Systems · Founder / Lead Developer

2022 — present · Own project (venture)

Built a multi-tenant SaaS ecosystem with e-commerce, POS and DIAN e-invoicing, and credit management. NestJS, PostgreSQL and Docker; pub/sub, HMAC webhooks, JWT/OAuth2 and CI/CD. In production with real clients.

Finca Directa S.A.S · CTO / Systems Manager

Nov 2021 — present · Service contract

Built administrative automation with Node.js and Python: invoice OCR, bank statements, email classification and CRM sync. Idempotency, human validation and decision logging.

Indie Levels Studio S.A.S · Backend Developer

Aug 2021 — present · Fixed-term contract

Developed and maintained REST APIs and backend services with Node.js/TypeScript and PostgreSQL for game products used across countries. Version control and testing to support stable releases.

Full history—including Critertec / INDOTEL (2024–2026)—and portfolio: informatico.stevenvallejo.com

● SELECTED PROJECTS

Cauce V3 · humanizar.tech

Agent-fleet orchestrator: delivery contracts, deployments, monitoring and multi-tenant CRM in production. My flagship engineering project.

ST · auto.logic · Órganon · organon.stevenvallejo.com

Executable formal logic: custom CDCL SAT solver and type theory. auto.logic translates natural language using rules, without AI; Órganon lets you try both. Philosophy turned into software.

Ágora · agora.elenxos.com

Academic platform, collaboration and AI agents. Designed architecture, backend and MCP tools with Zod contracts and real-time communication. Own project, not employment.
